

As  
can be easily put between loops of the coil using a tool without damaging the coil and then a position of the loops of the coil can be adjusted to tune the coil;

the material of the surface includes a water soluble material;

the terminals are strait sections of wire extending tangentially to the loops of wire at each end of the coil of wire;

the coil is an air coil without any core;

the wire is nearly pure copper;

the wire is between .05 mm and 1 mm in diameter;

the coils are spaced between 1.1 and 20 times the diameter of the wire; and

the diameter of the loops is between 10 and 100 times the diameter of the wire.

16. The package of claim 1 in which the coils are spaced between 2 and 10 times the diameter of the wire.

---

REMARKS

The Applicant respectfully requests entry of the above amendment prior to examination.

The above amendments are submitted to place this application in proper U.S. format. Entry of the amendment and an early action on the merits are solicited.

Respectfully submitted,
